

HTJY-80S Automatic Insulating Oil Dielectric Strength Tester (Three Cups)

I. Introduction

This equipment was designed on basis of GB-86“Oil-insulating testing”, the process and result displayed by LCD, built-in EEPROM , can save 50 groups test results, all work can finished by mouse, test results printed by micro printer. This equipment is easy to operate, with powerful functions, stable and reliable, with strong anti-jamming ability, without death halt during the test.

II.Features

1. This process and test results are displayed by LCD.
2. Built-in EEPROM can store more than 50 groups test results.
3. All work can be finished by mouse, test results are printed by micro printer
4. This equipment is easy to operate, with powerful functions, stable and reliable, with strong anti-jamming ability, without death halt during the test.

III. Parameters

Input voltage	AC 220V±10%
Output voltage	AC 0~80KV
A cup, B cup, C cup	Can be arbitrarily chosen and combined
Voltage boosting speed	2KV/s±10%
Accuracy degree	3
Number of times of continuous test	1~6
Stirring time	0~99 seconds
Standing time	0-9 minutes 59 seconds
Storage capacity	50 groups data
Voltage limit setting	20KV~70KV
Voltage withstand time	0~10 minutes
Temperature	5~40°C
Humidity	≤80%RH
Dimension	420×380×410mm3
Weight	28kg

IV. Accessories
