IKA MultiDrive basic

/// Data Sheet

Regardless of whether samples are hard, soft or fibrous – the IKA MultiDrive crusher can perform a wide range of crushing tasks involving coarse and fine crushing, thanks to the variety of vessels
available. With the MultiDrive basic it is possible to mix or grind. There is a USB interface available for easy actuation and
documentation respectively. In combination with the milling chamber MI 250 MultiDrive basic replaces your M 20 mill.

High performance
Excellent crushing performance is guaranteed by a combination of

variable rotational speeds, ranging from 3000 rpm to 20 000 rpm, and a 1000 Watt output.

Interval operation
The option of interval programming is simple to activate at the press of a button. Interval operation is an asset during the coarse crushing of hard samples or for extra thorough blending.

Integrated cooling
A cooling system is integrated in the milling cup, which allows indirect heat dissipation. Thus, coolant and sample remain separate.

Variety of vessels (accessory)
MultiDrive provides the right vessel for each grinding task.
Vessels don't belong to the scope of delivery.
